

ABOUT US

Our Establishment is started its operation in the year 2013 as a proprietary practice in the name of **ENSTRUCTURA CONSULTANTS**. In the year 2017, in order to extend our services widely in the field of civil engineering, a private limited company called **ENSTRUCTURA CONSULTANTS PRIVATE LIMITED (ECPL)** is established by professionals to offer comprehensive, innovative, state of art consultancy services with expertise developed over three decades among individuals. The experts of the company are having individual experience of about 2 to 3 decades in the various fields of structural engineering who were worked in Torsteel Research Foundation in India (TRFI) and in Civilaid and trained under the mentorship of Dr. C.S.Vishwantha who was one among the renowned consultants then.

TEAM OF EXPERTS

S.RAVI M.tech
Technical director

35 + years of experience
In the field of structural
design of
Rcc structures
Steel structures

Member of Association of
Consulting Civil Engineers

Empaneled Structural
Engineer in KIADB

K PRASANNA M.tech
Technical director

25 + years of experience
In the field of structural esign of
Rcc structures
Steel structures

Fellow member of Association of
Consulting Civil Engineers
Professional engineer of
engineering council of India
Chartered Engineer from Institute of
Engineers, India. Registered structural
Engineer in BBMP, Bangalore

SHARATH CHANDRA V
M.tech
Technical director

35 + years of experience
In the field of Structural
construction, project
management consultancy,
ISO auditing, Technical/QS
audits, green building,
innovative methodology of
construction techniques.

SUBRAMANYA B S
M.tech
Technical director

Over 30 years of experience
in Civil Engineering Project
Planning & Execution Site &
Construction Management
Contract Management,
Quality Assurance Liaising &
Coordination Vendor
development, Site Inspection
Cost Optimization Manpower
Planning.

TEAM OF EXPERTS

S.Manoranjan
Technical director

Over 25 years of expertise in Non-destructive testing of concrete steel structure, investigation, restoration and rehabilitation of structure, Quality auditing of construction, assessment of damage of structure, seismic retrofitting structure, RLA studies of thermal/hydro power plants, evaluation of bridges etc.,

M.N.Ramesh
Technical Advisor

Areas of Expertise:
Remedial Engineering,
Structural Health monitoring,
Concrete Technology, Pre-stressed Concrete,
Construction Chemicals,
Cathodic Protection, NDT etc..

M.S.Shivakumar
Technical Director

Over 25 years of expertise in Non-destructive testing of concrete steel structure, investigation, restoration and rehabilitation of structure, Quality auditing of Construction, assessment of damage of structure, seismic retrofitting structure, RLA studies of thermal/hydro power plants, evaluation of bridges etc.

Narayana Achutha

M.Tech. (Hydraulics & Water Resources), Indian Institute of Technology, Kanpur

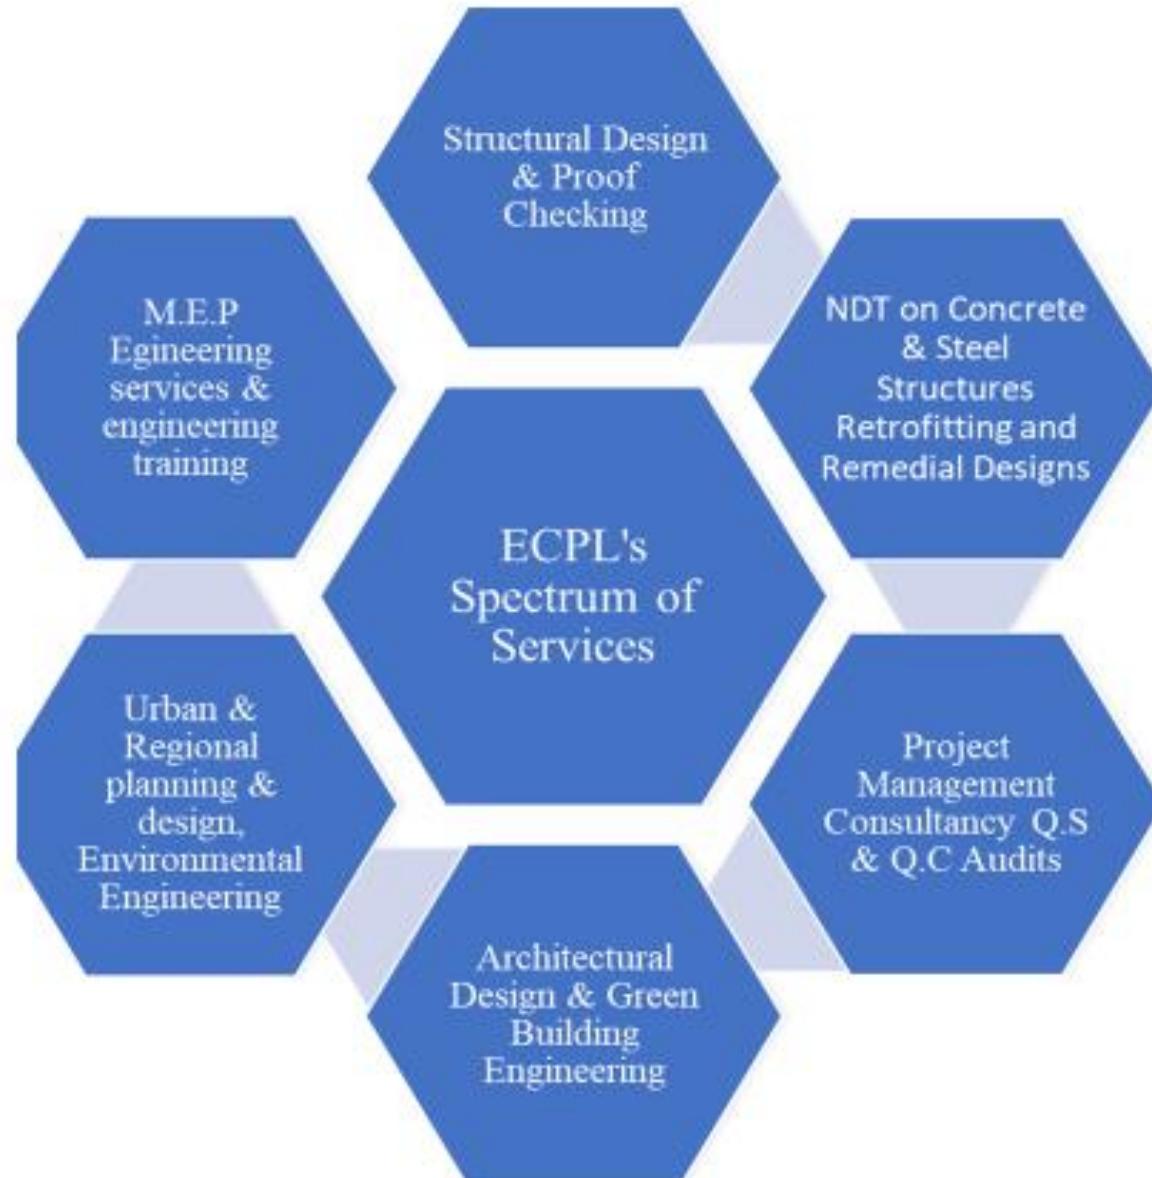

Skilled in providing Design Consultancy for Hydro Projects, Irrigation and Infrastructure Projects, preparing feasibility report, detailed project report, tender stage documents and detailed engineering (construction stage design) for various Hydroelectric Projects in India

OUR *Mission*

Our Mission is to combine all applicable skills to resolve any critical problems in civil engineering and obtain the solution which is functionally sound, economically feasible and practically applicable with a technical excellence and maintaining ethical standards.

(Comprehensive Skill Visualization and development training center for professionals and civil engineering students through Professional Training Programmes delivered by experts in various fields of civil engineering at Enstructura Consultants Pvt. Ltd., -Technical Training Division)

FIELD INVESTIGATION EQUIPMENT

LAB TESTS ON FIELD SAMPLES

- Lab tests on field samples of hardened concrete are crucial, assessing structural integrity, and estimating long-term durability of concrete structures. They help identify potential issues and guide necessary remedial strategies. E.g.:

Chloride Ion Content Test:

Purpose: To measure the concentration of chloride ions in concrete, which can lead to corrosion of steel reinforcement.

Procedure: Extract samples from the concrete and conduct chemical analysis to determine chloride ion content.

Carbonation Depth Test:

Purpose: To determine the extent of carbonation, which can reduce concrete's alkalinity and affect durability.

Procedure: Samples are exposed to a phenolphthalein solution, and the depth of color change is measured to assess carbonation depth.

LAB TESTS ON FIELD SAMPLES

Rapid Chloride Permeability Test (RCPT):

- **Purpose:** To evaluate concrete's resistance to chloride ion penetration, which is crucial for durability in industrial and marine environments.
- **Procedure:** A voltage is applied across a concrete sample, and the rate of chloride ion migration is measured.

Petrographic Analysis:

- **Purpose:** To examine concrete samples under a microscope to identify and assess the distribution of aggregates, cement paste, and any potential defects.
- **Procedure:** Thin sections of concrete are prepared and analyzed by a petrographer.

Moisture Content Test:

- **Purpose:** To determine the moisture content of concrete, which can impact its properties and durability.
- **Procedure:** Samples are weighed before and after drying to calculate moisture content.

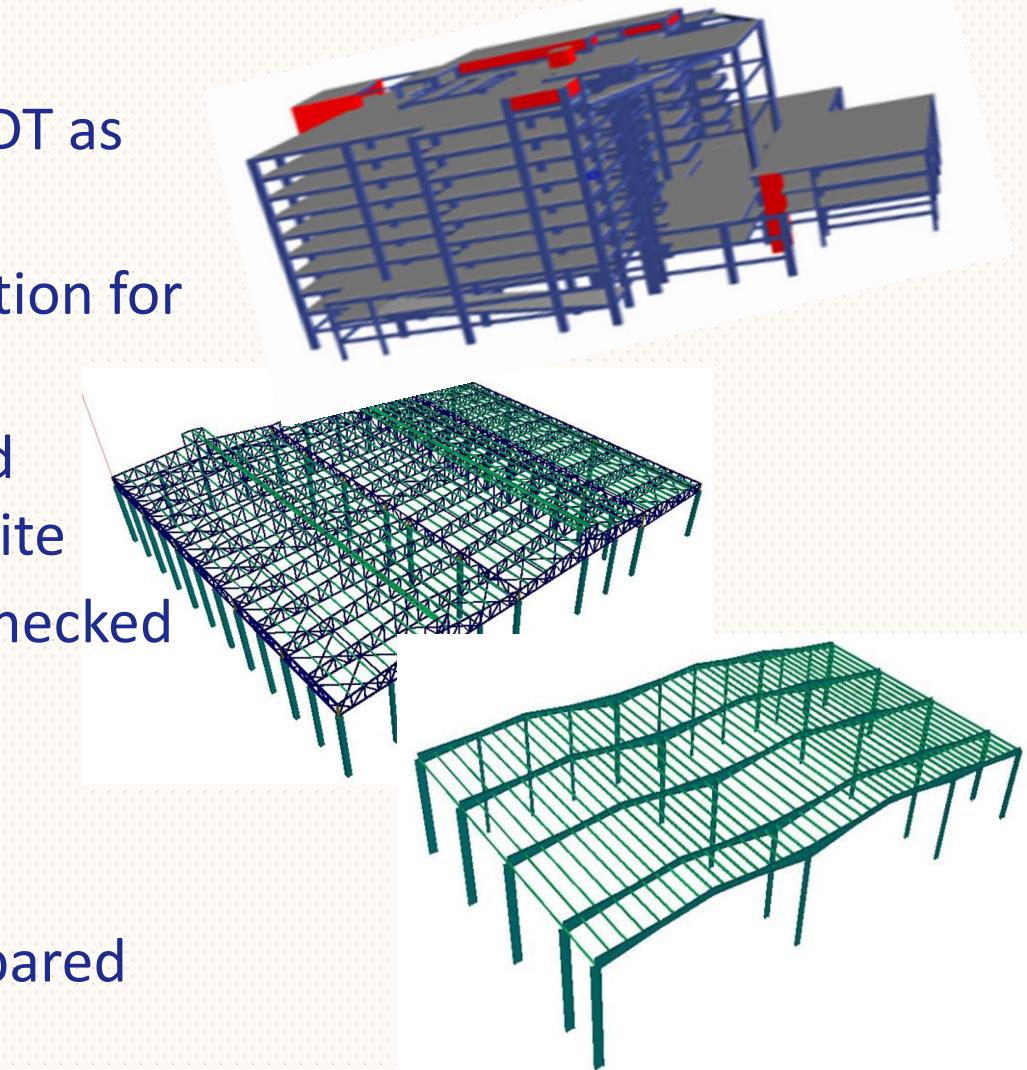

TESTING AND INVESTIGATION ON STEEL STRUCTURES

- Ultrasonic Thickness Gauging
- Dye-penetration Tests
- Weld testing by Ultrasonic Pulse echo method
- Lab tests on samples collected from site e.g., Tensile strength, Chemical Analysis etc
- Visual observation for deformity, verticality, corrosion, identification of missing members etc.
- Structural Analysis

THEORETICAL STRUCTURAL ANALYSIS AND STRUCTURAL ADEQUACY CHECK

- Using the results of the field investigation and NDT as input data a 3 D model analysis is carried out.
- The output data is compared with the field condition for verification
- Remedial Engineering measures are designed and reviewed from the constructability viewpoint at site
- Modifications, if required are carried out and rechecked for the structural adequacy
- The process is iterative
- Durability check is carried out
- Methodology and construction drawings are prepared based on the above process
